

This October...

Shake your mailbox

This simple trick will get you ready for winter.

Winter is coming. Don't let your mailbox become a casualty of winter weather.

Damaged mailboxes can be hazardous to drivers if they come loose

Mailboxes that aren't sturdy are more likely to break or be damaged by heavy snow, wind and the force from plows.

To check the sturdiness of your mailbox, shake it by the post and if it “gives,” it's likely that your mailbox could come loose this winter.

Check with the Road Commission and post office for mailbox type and placement policies, as well as any replacement options for damaged mailboxes.
